ADVANCED TREATMENT SYSTEM (ATS) MAINTENANCE PROVIDER CLASS

The Regulations to Govern Subsurface Sewage Disposal Systems (0400-48-01-.10(c) 3) require the property owners of ATS systems to contract with an approved maintenance provider to provide proper operation and maintenance of the ATS system.

This class/training is provided to meet the requirements of Rule 0400-48-.01-.23 **Maintenance Providers for Advanced Treatment Systems and Subsurface Drip Disposal** of the Regulations to Govern Subsurface Sewage Disposal Systems.

Attending and passing this class is necessary for those who intend on becoming maintenance providers of ATS and Subsurface Drip Disposal systems.

Who should attend?

- Those who are interested in becoming residential ATS system service providers or who are interested in representing a manufacturer of advanced onsite wastewater treatment technologies.
- Installers who want to learn more about how ATS systems operate.
- Soil scientists and other professionals who work in the onsite waste water treatment area.
- Engineers and designers who need a better understanding of how to design these systems for maintenance and long term performance.

When: November 1 and 2 beginning at 8 AM

Where: Fleming Training Center, 2022 Blanton Drive Murfreesboro, TN 37130

Cost: \$400- includes instruction, textbook, handouts, giving and grading exam, lunch, snacks and drinks

Instructor: John R. Buchanan Associate Professor Biosystems Engineering & Soil Science
UT Knoxville

If you are interested in taking this class please contact John Buchanan at jbuchan7@utk.edu or 865-974-7266.
